

Hallberg-Rassy

GN Space cooker installations

GN Espace marine cookers

GN Espace cookers can be easily installed into the original and unmodified HR Cooker Box. The same Crash Bar can be used. The installation places the cooker at the optimal working height, level with the worktop.

Depending on the HR model, it is also sometimes possible to install the GN Espace cooker lower and still allow the lid to be used. Please satisfy yourself of this by using the attached drawings.

Take a look at the video links which show the many features and benefits of the GN Espace marine cookers.
